

The WhisperSoft System

The smarter way to get *better* heating & cooling for you home.

ATTRACTIVE

5 1/2" diameter registers resemble recessed lighting & blend in perfectly. Available in white, brown, & natural oak.

QUIET

Engineered for whisper quiet operation by eliminating louvers & increasing air speed at the same time.

ACTUAL SIZE

EFFICIENT

WhisperSoft maintains a uniform temperature in every room without hot or cold areas. Air will now remain fresher & better filtered for allergens.

QUALITY

All components are made from the best materials possible. The result is a durable & trouble free system that will add value & lasting comfort.

The WhisperSoft System

“THE ULTIMATE UPGRADE”

WhisperSoft is the premier heating and cooling system on the HVAC market today. This has been designed to fit into almost any setting and blend into the background.

This system was made with one thing in mind - to vastly improve the way standard ventilation systems look & perform. We succeeded.

Whispersoft is ideal for use in all homes, historical buildings, offices & new construction.

System Features

new **HYBRID** design

small **5 1/2"** round vent

very **QUIET** air sound

fits in tight spaces

uniform air circulation

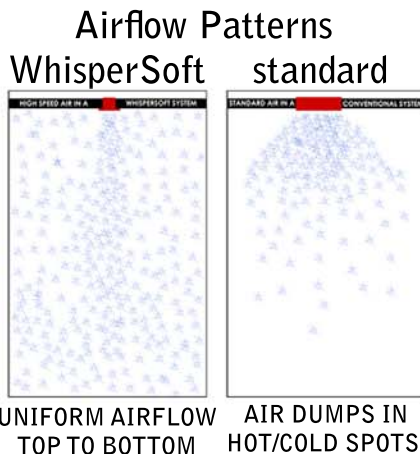

installs quickly

designed for home remodels

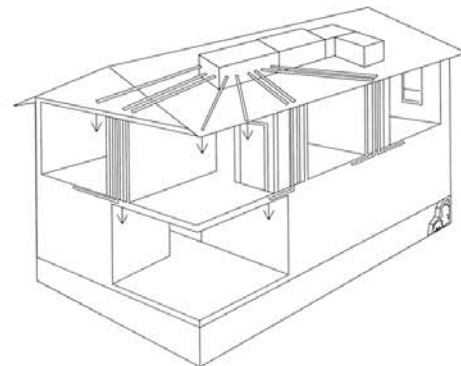

ideal for homes with radiators

up to **25%** recycled materials

The WhisperSoft System incorporates all the best features taken from conventional and high velocity designs to create a unique hybrid system.

Hidden System Installation

Fits in existing walls, ceilings, & floors

WhisperSoft is less expensive, has fewer registers, & is more efficient than high velocity systems. WhisperSoft is more attractive & produces more uniform air temperature than conventional systems. Finally, WhisperSoft is quieter & higher quality than BOTH types of systems. Order yours today!
